

SHARP

UP-600

Sharp presents a versatile, sophisticated but easy-to-use point of sale retail terminal with great connections to improve the way you run your business.

- ✓ Fast POS application
- ✓ Large, backlit multi-line display for ease of use and operational integrity
- ✓ Flexible network or stand-alone configuration options
- ✓ Quick and quiet thermal printing

SHARP

FOCUS ON UP-600

This sophisticated but easy-to-use retail terminal allows users to enjoy all of the benefits of a closed EPOS solution. The powerful POS application has been developed by Sharp to produce a mature and comprehensive system that perfectly matches the hardware platform.

The compact UP-600 can be used independently or as part of a network of terminals courtesy of a standard TCP/IP Ethernet network (when fitted with the optional Ethernet card). A system can be configured in a simple Master/Slave configuration without the need for a 'back-office' system or can be linked to a third party 'back-office' system for centralised control from the desktop.

Additionally, the UP-600 can be mixed on the same network for combined retail and hospitality operations with its hospitality sister terminal, the UP-700.

Quiet and fast integral thermal printing helps support improved transaction times with the minimum of fuss, while customers will appreciate the large, back-lit LCD display, which enables the operator to read eight lines of a transaction clearly and quickly.
